Dear Hiring Manager,

I am writing to express my interest in the Senior Frontend Developer position. With 6 years of experience in frontend development, application architecture, and technical leadership, I have delivered scalable, high-performance applications for enterprise and government organizations in Cambodia.

My expertise includes Angular, Vue, React, JavaScript, TypeScript, Node.js, and NestJS, with strong experience in RESTful APIs, MySQL, PostgreSQL, state management, responsive UI development, and performance optimization.

In my previous role as a senior frontend developer/team lead at Ecoinsoft Solution Co., Ltd., I led frontend development, provided technical direction, conducted code reviews, and established development standards. I contributed to large-scale projects, including the Examination, School Management, HR Management, Ministry of Environment, Vessel Monitoring, Ministry of Health, insurance platforms (Infinity, Camlife, IAC), and government digital transformation projects.

I focus on building scalable, maintainable, secure, and user-centered applications while collaborating closely with UI/UX designers, backend developers, product owners, and other stakeholders. I believe my technical expertise and enterprise experience would allow me to contribute effectively to your team.

Thank you for considering my application. I look forward to the opportunity to discuss my experience with you.

Sincerely,
Hong Menghort
